Back to normal

Life slowly returns. Things are slowly normalizing throughout Europe now that vaccination programs are implemented in all European countries. This is good news for UHS2021. The risk of the event not being able to take place due to the corona crisis is diminishing day by day. On that background we continue to send invitations all over Europe with increasing conviction that the event will be carried out.

Now the team of interesting lecturers is also expanding. In addition to Keith Helfet, who will talk about design in a broad and artistic sense, we have now got a real materials expert associated to the event. This is the Danish engineer, Hans Schmidt Lindholm, who through his education and a long career as an engineer in i.a. the aluminium industry, has gained a large experience base within aluminium in particular. He is simply aluminium expert, and he has as such held many courses and conferences for innovative networks in the aluminium industry. The topics range from knowledge of materials over applications to machining techniques for aluminium.

Hans Schmidt Lindholm - an expert in aluminium

Hans Schmidt Lindholm is originally a bachelor of Science in Engineering (BSc. Eng. Production) / Dipl.-Ing. Production (FH) Field Of Study Teknikum Grade M.

His business career has brought him to well-known companies such as Bang & Olufsen, where he was manager of casting and surfaces. He has been employed by Hydro Aluminium Tubing as a manager in the automotive industry. Later he started teaching theory and practice at Aluminium Vocationa shopfloor courses and AluCluster foundation.

He has been a developer at Industriens Uddannelser and Dansk Materiale Netværk. Since 2007 he has run his own consulting company Hans Lindholm ApS and right now in 2021 he is launching the company AluHub.

With this back catalogue, he will give us a presentation on the theme of aluminium with a high degree of information, just as during the entire event there is the opportunity to consult Hans Schmidt Lindholm on the theme of aluminium.

Member of the project group

Apart from being associated with UHS2021 as an expert and lecturer Hans Schmidt Lindholm also joined the project group behind the

Hans Schmidt Lindholm - Engineer & CEO AluHub

UHS2021 event. We are delighted to have him on board with his large experience both as an experienced conference host and an expert within the subject areas materials and machining techniques.

The entire project group

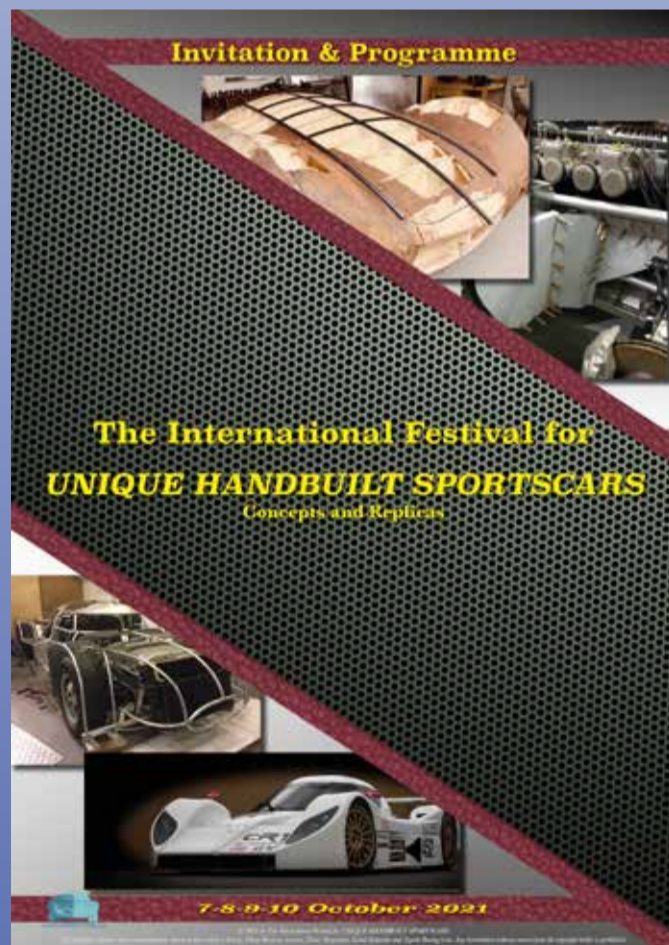

In the next issue of the UHS2021 Newsletter, we will make a closer presentation of the members of the project group behind the International Festival for UNIQUE HANDBUILT SPORTSCARS.. Apart from as beforementioned, Hans Schmidt Lindholm, the group consists of Henning Christiansen, Mikael Ovesen and your event manager and editor, Anton Schulz.

How to reach people nowadays?

We have probably never had so many communication platforms as we have today. We can communicate via mail, smartphones, mobile text, Skype, Messenger, Facebook, Twitter, Instagram, websites, club magazines, Theme magazines and probably another thousand options are available. But how do we reach the right target groups with all these platforms?

The short answer is that we really don't know for sure. But spreading the word through a network of people might be a good option. We have tried to communicate as direct and selective as possible. As from now however we will communicate and invite in a wider.

Nudge your network

If you have the interest to participate in the International Festival of UNIQUE HANDBUILT SPORTSCARS, but prevented from doing it by any reason, you might know of someone else, who really should have the chance given. In such case you can point them in direction of our website, from which it's possible to obtain more information about the event where we also made an open invitation available for download. This contains all information about the event and contact details. It is also possible to ask us question directly from our website here:

<https://provinsbyer.dk/ask-us>.

It is also possible to mail us direct on this mail:

schulz@asconbs.com

New readers can begin here

If this newsletter is the first one you received and you think: "Where went issue number 1, 2 and 3?" there is hope as we have made all the newsletters available for download from our website at this web address:

<https://provinsbyer.dk/downloads-and-programme>

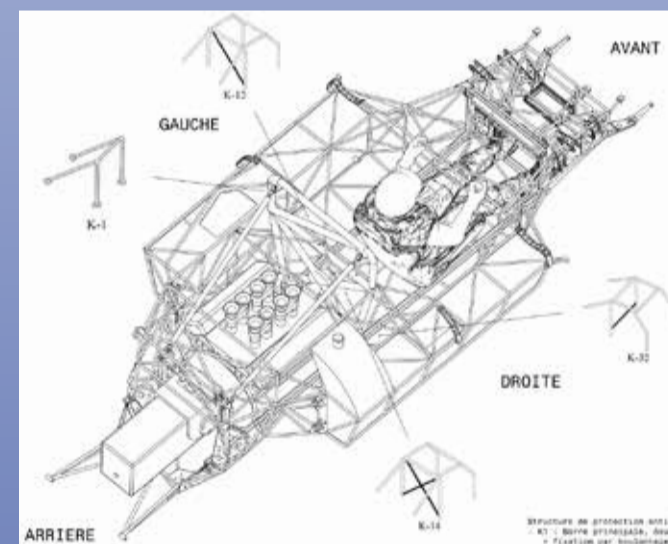

Newsletter no 1 can be reached here:

It is time to sign up for UHS2021

It is now time to sign up for this first edition of The International Festival of UNIQUE HANDBUILT SPORTSCARS.

If you are in the process of a car project, it is now time to sign up for UHS2021 regardless whether your project is completed or just ongoing. We are at least as interested in showing semi-finished projects, where you can see interesting technical details and solutions as to finished cars where details are nicely wrapped in an attractive car body finish or tucked away in the doors behind delicious and sound-absorbing cladding. Regardless of the stage of your project, it is of interest to us as long as it meets the criteria of hand-built sports and racing cars.

Now put all thoughts of Corona in the background. If, contrary to all expectations the event is not carried out due to corona, you will be refunded your entire entry fee. But we believe in the future and that normalcy returns.

Sign up and look forward to an extended weekend with like-minded people in a relaxed environment.

Yours Sincerely

Anton Schulz
Event Manager

Unique Hand Built Sports Cars

Newsletter 1 - UHS2021

At the end of January at the beginning of 2021, 19 visitors from the UHS2021 website, who should be involved in the UHS2021, will be asked to participate, until it is clear who can be completed or not.

The first portrait article

Now all this makes me have some intention to be the first participant who has signed up.

In the portrait of Stefan 'Chadler' from his project about the creation of a Lotus replica, Stefan is extremely dedicated to his passion and perhaps to achieve his dream.

He has been working on it for a long time and is very proud of his work. He is the first participant who has signed up.

Stefan's biography
Stefan's biography
Stefan's biography
(1/10/2021)

On the way to the end of the year, I have decided to stop for a moment. I have decided to stop for a moment. I have decided to stop for a moment.

In the next planning of the event, we will see a minimum of 15 participants from the UHS2021 website. I will see a minimum of 15 participants from the UHS2021 website. I will see a minimum of 15 participants from the UHS2021 website.

Background and more

The idea to create an event for (electric) sports cars has been in my mind since the first time. In 2018, I had the idea to create an event for (electric) sports cars. I had the idea to create an event for (electric) sports cars. I had the idea to create an event for (electric) sports cars.

My current preparations to create an event for (electric) sports cars have been in my mind since the first time. I had the idea to create an event for (electric) sports cars. I had the idea to create an event for (electric) sports cars.

With these ideas in mind, I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

Last November, I had the idea to create an event for (electric) sports cars. I had the idea to create an event for (electric) sports cars. I had the idea to create an event for (electric) sports cars.

Many have expressed interest in this, but it is a long time. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

First News Letter

On the background of the first time, I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

There are many of you who are interested in this event, and it is my hope that the first time will be a success. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

To find the first time, I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

If you have been able to create an event for (electric) sports cars, I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

In the next planning of the event, we will see a minimum of 15 participants from the UHS2021 website. I will see a minimum of 15 participants from the UHS2021 website. I will see a minimum of 15 participants from the UHS2021 website.

Some of you have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.

A unique initiative and a unique opportunity

The idea to create the International Show for UHS2021 is a unique opportunity for all participants to see the latest and most advanced of (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars. I have been able to create an event for (electric) sports cars.
